Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 11-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 11-18 depend from claims that have been canceled. Since the scope of claims 11-18 cannot be determined, they have not been further treated on the merits.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rubenstein (6,798,663) in view of Barker et al (5,597,034).

Rubenstein discloses (see Figs. 4A-4D) a multi-heatsink cooler including at least two electronic components, at least two heatsinks (303a, 303c) with heat exchanging means (fins 303), a blower (309), and a housing (see Fig. 4A), each of the heatsinks including a base thermally connected with at least one of the electronic components and the heat exchanging means, and at least one inflow opening and outflow opening, a cover plate being attached to the heatsinks.

Rubenstein does not show the fan being an axial fan or having a casing with an inlet and outlet.

Barker et al disclose a heatsink cooler including a heatsink (16) with heat exchanging means (17, 19), a radial blower (col. 3, line 57), and a housing (Figs. 1 and 3), the heat sink (16) including a base (11) connected to an electronic component (13a) and the heat exchanging means (17, 19), and at least one inflow opening (at the bottom of the casing) and an outflow opening (at the sides of the casing)(col. 3, lines 54-56).

It would have been obvious in view of Barker et al to use an axial fan having a casing with an inlet and outlet with the heatsink cooler of Rubenstein, the motivation being to provide improved cooling of the electronic component.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kotterman, Lin, Hu, Lo, Kozyra, Lee et al, Wagner, Huang et al, Mira, Wang et al, and Erel are cited to show heat sinks with fans or blowers.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa J. Walberg whose telephone number is 571-272-4790. The examiner can normally be reached on M-F 9:00 - 5:30.
